Product brand
Range of Product

RLA Polymers
Glue

Profile

Plummas PVC Pipe Priming Fluid is a solvent based product which is specially formulated to clean and prime PVC-U pipes and fittings so they are free of dirt and grease.

The application of PVC Pipe Priming Fluid is essential preparation prior to the application of PVC Pipe to ensure a satisfactory bond is achieved. It is fast drying and leaves a pinkish stain to indicate where the PVC pipe has been correctly primed. Plumma's clear priming fluid is used wherever Plumma's Blue Glue cements are used including the residential commercial, industrial, agriculture and mining sectors.

Standards AS/NZS 3879 and AS/NZS 4020

Size 500ml
